

GUARDRAIL

Guardrail provides user fall protection

DESIGN

- Can be fitted to any sides of Series 1, 2 or 3 Platforms and to any 600mm increment from the corners.
- Clean, straight lined for a very tidy look.
- All aluminium components with stainless steel fixings - backed by a 20 year warranty.
- Super lightweight 3kg / lineal metre
- Complies to BS EN 516 2006 and BS EN 1090-3 2008

VERSATILITY

- Configurable online in 600mm increment lengths to suit your requirements.
- The lightweight aluminium design makes it easy for carrying, craning and assembly.

EFFICIENCY

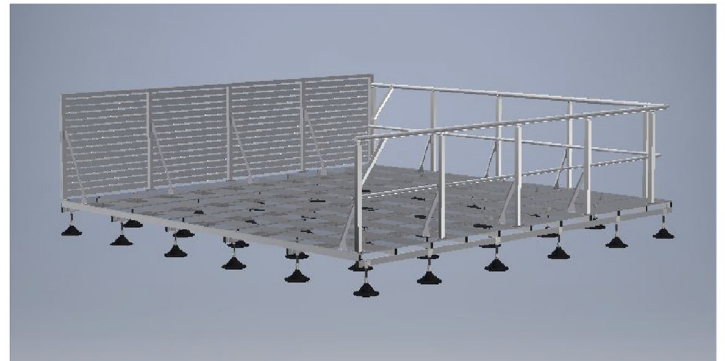

- Our agile systems mean that platforms with Guardrail are ready to ship within a day or two of order.
- Kit form allows them to be assembled by a trade already on site with our easy to follow installation manual.
- Take the stress out of your project with our nationwide approved installer network.

SPECIFY CONFIGURED PLATFORMS

- Provide Guardrail to Configured Platforms edges where platform is 300mm above adjacent surface.

OPTIONAL ACCESS GAP OR GATE

- An access gap of any 600mm increment wide is configurable in the Guardrail.
- A Self-Closing Access Gate 600mm wide is configurable in the Guardrail on any of the 4 sides of the platform.
